Notes:

-- compound not analyzed for  
 \* - compound was not detected above MDL or PQL; MDL or PQL are estimated  
 <value - compound was not detected above MDL or PQL; value listed is MDL or PQL  
 † nanograms per liter (ng/L) are equivalent to parts per trillion (ppt).  
 ‡ Raw water sample ID labeled with "O" rather than "R" at end of sample name.  
 B - compound detected in method blank  
 J - indicates estimated value  
 MDL - method detection limit  
 ng/L - nanogram per liter  
 PFAS - per- and polyfluoroalkyl substances  
 PQL - practical quantitation limit

Legend:

Detected above the quantitation limit  
 Non-detect in samples after canisters  
 Detected in laboratory method blank

Notes Continued:

- 1 - Samples collected since March 14, 2019 were analyzed for compounds listed in Consent Order Attachment C, hence only HFPO-DA, Table 3 and Perfluorheptanoic acid data are reported.
- 2 - Data are not reported for the raw water sample collected on 30 August 2018. The data from the original analysis and the re-analysis of the sample extract were not consistent with each other or previously collected sample. Location is being re-sampled on 27 September 2018.
- 3 - Both carbon canisters at Sampling Site 75 were replaced on 17 October 2018. Chemours received and reviewed the laboratory analyses from the 27 September 2018 collected samples on 15 October 2018 and then authorized replacement of both carbon canisters.
- 4 - Data not reported for the after iron and sediment filter water sample collect on 26 November 2018. Location was re-sampled in December 2018.
- 5 - Chemours instructed its contractors on the week of May 13, 2019 to replace both carbon canisters.

- \* - compound was not detected above MDL or PQL; MDL or PQL are estimated
- <value - compound was not detected above MDL or PQL; value listed is MDL or PQL
- † nanograms per liter (ng/L) are equivalent to parts per trillion (ppt).
- ‡ Raw water sample ID labeled with "O" rather than "R" at end of sample name.
- B - compound detected in method blank
- J - indicates estimated value
- MDL - method detection limit
- ng/L - nanogram per liter
- PFAS - per- and polyfluoroalkyl substances
- PQL - practical quantitation limit

**Legend:**

- Detected above the quantitation limit
- Non-detect in samples after canisters
- Detected in laboratory method blank

**Notes Continued:**

- 1 - Samples collected since March 14, 2019 were analyzed for compounds listed in Consent Order Attachment C, hence only HFPO-DA, Table 3 and Perfluorheptanoic acid data are reported.
- 2 - Data are not reported for the raw water sample collected on 30 August 2018. The data from the original analysis and the re-analysis of the sample extract were not consistent with each other or previously collected sample. Location is being re-sampled on 27 September 2018.
- 3 - Both carbon canisters at Sampling Site 75 were replaced on 17 October 2018. Chemours received and reviewed the laboratory analyses from the 27 September 2018 collected samples on 15 October 2018 and then authorized replacement of both carbon canisters.
- 4 - Data not reported for the after iron and sediment filter water sample collect on 26 November 2018. Location was re-sampled in December 2018.
- 5 - Chemours instructed its contractors on the week of May 13, 2019 to replace both carbon canisters.

Notes:

- compound not analyzed for
- \* - compound was not detected above MDL or PQL; MDL or PQL are estimated
- <value - compound was not detected above MDL or PQL; value listed is MDL or PQL
- † nanograms per liter (ng/L) are equivalent to parts per trillion (ppt).
- ‡ Raw water sample ID labeled with "O" rather than "R" at end of sample name.
- B - compound detected in method blank
- J - indicates estimated value
- MDL - method detection limit
- ng/L - nanogram per liter
- PFAS - per- and polyfluoroalkyl substances
- PQL - practical quantitation limit

Legend:

- Detected above the quantitation limit
- Non-detect in samples after canisters
- Detected in laboratory method blank

Notes Continued:

- 1 - Samples collected since March 14, 2019 were analyzed for compounds listed in Consent Order Attachment C, hence only HFPO-DA, Table 3 and Perfluorohexanoic acid data are reported.
- 2 - Data are not reported for the raw water sample collected on 30 August 2018. The data from the original analysis and the re-analysis of the sample extract were not consistent with each other or previously collected sample. Location is being re-sampled on 27 September 2018.
- 3 - Both carbon canisters at Sampling Site 75 were replaced on 17 October 2018. Chemours received and reviewed the laboratory analyses from the 27 September 2018 collected samples on 15 October 2018 and then authorized replacement of both carbon canisters.
- 4 - Data not reported for the after iron and sediment filter water sample collect on 26 November 2018. Location was re-sampled in December 2018.
- 5 - Chemours instructed its contractors on the week of May 13, 2019 to replace both carbon canisters.

**Notes:**

-- compound not analyzed for  
 \* - compound was not detected above MDL or PQL; MDL or PQL are estimated  
 <value - compound was not detected above MDL or PQL; value listed is MDL or PQL  
 † nanograms per liter (ng/L) are equivalent to parts per trillion (ppt).  
 ‡ Raw water sample ID labeled with "O" rather than "R" at end of sample name.  
 B - compound detected in method blank  
 J - indicates estimated value  
 MDL - method detection limit  
 ng/L - nanogram per liter  
 PFAS - per- and polyfluoroalkyl substances  
 PQL - practical quantitation limit

**Legend:**

Detected above the quantitation limit  
 Non-detect in samples after canisters  
 Detected in laboratory method blank

**Notes Continued:**

- 1 - Samples collected since March 14, 2019 were analyzed for compounds listed in Consent Order Attachment C, hence only HFPO-DA, Table 3 and Perfluorheptanoic acid data are reported.
- 2 - Data are not reported for the raw water sample collected on 30 August 2018. The data from the original analysis and the re-analysis of the sample extract were not consistent with each other or previously collected sample. Location is being re-sampled on 27 September 2018.
- 3 - Both carbon canisters at Sampling Site 75 were replaced on 17 October 2018. Chemours received and reviewed the laboratory analyses from the 27 September 2018 collected samples on 15 October 2018 and then authorized replacement of both carbon canisters.
- 4 - Data not reported for the after iron and sediment filter water sample collect on 26 November 2018. Location was re-sampled in December 2018.
- 5 - Chemours instructed its contractors on the week of May 13, 2019 to replace both carbon canisters.

Notes:

- compound not analyzed for
- \* - compound was not detected above MDL or PQL; MDL or PQL are estimated
- <value - compound was not detected above MDL or PQL; value listed is MDL or PQL
- † nanograms per liter (ng/L) are equivalent to parts per trillion (ppt).
- ‡ Raw water sample ID labeled with "O" rather than "R" at end of sample name.
- B - compound detected in method blank
- J - indicates estimated value
- MDL - method detection limit
- ng/L - nanogram per liter
- PFAS - per- and polyfluoroalkyl substances
- PQL - practical quantitation limit

Legend:

- Detected above the quantitation limit
- Non-detect in samples after canisters
- Detected in laboratory method blank

Notes Continued:

- 1 - Samples collected since March 14, 2019 were analyzed for compounds listed in Consent Order Attachment C, hence only HFPO-DA, Table 3 and Perfluoroheptanoic acid data are reported.
- 2 - Data are not reported for the raw water sample collected on 30 August 2018. The data from the original analysis and the re-analysis of the sample extract were not consistent with each other or previously collected sample. Location is being re-sampled on 27 September 2018.
- 3 - Both carbon canisters at Sampling Site 75 were replaced on 17 October 2018. Chemours received and reviewed the laboratory analyses from the 27 September 2018 collected samples on 15 October 2018 and then authorized replacement of both carbon canisters.
- 4 - Data not reported for the after iron and sediment filter water sample collect on 26 November 2018. Location was re-sampled in December 2018.
- 5 - Chemours instructed its contractors on the week of May 13, 2019 to replace both carbon canisters.

Notes:

- compound not analyzed for
- \* - compound was not detected above MDL or PQL; MDL or PQL are estimated
- <value - compound was not detected above MDL or PQL; value listed is MDL or PQL
- † nanograms per liter (ng/L) are equivalent to parts per trillion (ppt).
- ‡ Raw water sample ID labeled with "O" rather than "R" at end of sample name.
- B - compound detected in method blank
- J - indicates estimated value
- MDL - method detection limit
- ng/L - nanogram per liter
- PFAS - per- and polyfluoroalkyl substances
- PQL - practical quantitation limit

Legend:

- Detected above the quantitation limit
- Non-detect in samples after canisters
- Detected in laboratory method blank

Notes Continued:

- 1 - Samples collected since March 14, 2019 were analyzed for compounds listed in Consent Order Attachment C, hence only HFPO-DA, Table 3 and Perfluoroheptanoic acid data are reported.
- 2 - Data are not reported for the raw water sample collected on 30 August 2018. The data from the original analysis and the re-analysis of the sample extract were not consistent with each other or previously collected sample. Location is being re-sampled on 27 September 2018.
- 3 - Both carbon canisters at Sampling Site 75 were replaced on 17 October 2018. Chemours received and reviewed the laboratory analyses from the 27 September 2018 collected samples on 15 October 2018 and then authorized replacement of both carbon canisters.
- 4 - Data not reported for the after iron and sediment filter water sample collect on 26 November 2018. Location was re-sampled in December 2018.
- 5 - Chemours instructed its contractors on the week of May 13, 2019 to replace both carbon canisters.
