Capstone™ FS-35
Fluorosurfactant

Technical Information

Description
Capstone™ FS-35 is a nonionic fluorosurfactant that provides exceptionally low surface tension in aqueous- or solvent-based products, enabling better wetting, spreading, leveling, and other beneficial properties. FS-35 is VOC-free, APEO-free, and compatible with additives and resins of any ionic class.

Even at very low concentrations, Capstone™ FS-35 can deliver tremendous wetting power. FS-35 is stable in acidic, basic, brine, and hard water environments—making it easy to formulate into a variety of systems. FS-35 is effective as an additive in cleaning products, paints, coatings, adhesives, and films.

Applications
Water-Based Floor Care (Finishes, Waxes, and Polishes)
- Provides wetting and excellent leveling
- Good re-wet characteristics in multi-coat applications
- Reduces cratering and provides faster spreading
- Compatible with hydrocarbon surfactants
- Suggested use rates are 0.01–0.05% active ingredient (A.I.)

Concentrated Cleaning Solutions
- Reduces surface tension and provides excellent wetting to achieve cleanability
- Provides improved wetting and penetration, especially with difficult to wet soils
- Suggested use rates are 0.01–0.1% A.I.

Aqueous-Based Paints and Inks
- Excellent wetting and leveling, reduced orange peel effect, extends open time
- Compatible with most aqueous-based paints
- Improved wetting in wood coatings
- Suggested use rates are 0.01–0.1% A.I. in aqueous-based paints

Metals and Electronics
- Improved etching efficiency
- Effective plating bath aid
- Zinc battery scale inhibitor

Stability and Surface Activity in Brine and Aggressive (Acidic and Basic) Media
