Fire Extinguishants

Product Information

**FM-200™**
FM-200™ is the world’s most widely specified waterless fire suppressant and the most cost-effective clean agent extinguishant for total flooding applications. FM-200™ is ideal for new construction, major renovations, or Halon replacement projects and safe for people while providing maximum protection.

**FE-36™**
FE-36™ is the standard in-kind replacement for Halon 1211 in portable fire extinguishers. FE-36™ has comparable performance and efficiency to Halon 1211, as well as zero ozone depletion potential (ODP).

**FE-25™**
FE-25™ can replace Halon 1301 in existing systems with minimal system modifications. With FE-25™, you get the easiest, most cost-effective method of removing Halon 1301 while maintaining the main structure of the system.

**FE-13™**
FE-13™ is the preferred alternative in niche total flooding applications, where protected spaces are large, the cylinder storage area is remote from the protected space, or temperatures are likely to go below 0 °C (32 °F).
