New carpet needs a durable cushion underneath to help protect from “life’s little accidents.” Future Foam Carpet Cushion with Teflon® surface protector offers this protection and much more, helping carpets last longer.

Put it to the test today. cushion.teflon.com futurefoam.com

The only carpet cushion you’ll need for your home
Luxurious softness. Exceptional protection.

A carpet is only as good as the pad underneath. With Future Foam Carpet Cushion with Teflon® surface protector, you will experience a noticeable, luxurious and plush feel underfoot, without the sacrifice in durability.

- No bumps or hard spots associated with lower quality pads
- Easy cleanup for spills
- Reduces possible growth of mold and mildew underneath the cushion
- Durability for the life of the home
- Three-year extended carpet wear warranty for any branded carpet

How does it work?

Unlike traditional carpet padding, Future Foam Carpet Cushion is made with premium foam to ensure consistent cushioning that is durable enough to handle the traffic of everyday life.

Let’s face it, spills can happen at any time. Teflon® surface protector is a moisture barrier that keeps spills on the surface of the cushion for easier cleanup, even for spills as old as 24 hours. Liquids won’t penetrate the pad or the sub-flooring, which means protection from mold and mildew.

Lasting performance.

Future Foam Carpet Cushion with Teflon® surface protector offers convenience, performance and protection, which in turn will leave you with peace of mind. See for yourself how one carpet cushion combines durability and protection from spills with incredible softness.
