Tefzel™ ETFE 750
Fluoroplastic Resin

200 °C (392 °F) Appliance Wire Insulation

Product Information

Tefzel® fluoroplastic resin, a close relative of Teflon™ fluoroplastic resin, was introduced in 1972. It has been used to insulate many millions of feet of cable for aircraft and other aerospace vehicles, rapid transit cars, computers, automobiles, factories, heating piping systems, and nuclear power plants. Now, a special grade of Tefzel® resin is available to provide this proven performance for 200 °C (392 °F) appliance wire.

Advantages of Tefzel® ETFE 750
- Easily stripped and terminated
- Unlike SF2 and SF1, it is so tough it doesn’t need a protective glass braid. Eliminating the glass braid means:
  - No irritating glass fibers
  - No glass strands to make terminations unreliable
  - Less stripping die wear
  - No braid to damage; thus, spoiling wire
  - No lacquers to smoke, crack, or turn brown with heat aging
- Superior fire resistance, thermal stability, and resistance to aging
- Colorable, printable, and strippable
- A pure polymer; not a compound with inconsistent composition and performance

Cost-Effectiveness
- Single thin-wall extrusion, 40% smaller OD than SF2
- Compatible with bare copper conductor per UL requirement; expensive plated conductor not required

Tefzel® ETFE 750 vs. Other Grades of Tefzel® ETFE
- Tefzel® ETFE 750 has 200 °C (392 °F) thermal rating for appliance wire, while all other grades are lower.
- Tefzel® ETFE 750 is more flexible than the other grades; for example, flexural modulus for Tefzel® ETFE 750 is 641.1 MPa (93,000 psi) vs. 1,171.9 MPa (170,000 psi) for Tefzel® ETFE 200.

UL and CSA Ratings
UL Subject 758 and CSA 210 rated at 200 °C (392 °F):
- UL Style 10109 for 300V
- UL Style 10086 for 600V

Styles 10109 and 10086 are UL-approved for bare copper conductors at 200 °C (392 °F), as long as the individual strand diameter is 15 mil and larger.
**Performance Test Results**

- **Cold Bend Test (4 hr at -35 °C [-31 °F])**: No cracks
- **Flexibility After All Oven Aging**: No cracks
- **Conductor Corrosion After All Oven Aging**: None
- **Impact (1.5 mil)**: 2 ft lb
- **Insulation Resistance (UL62)**: 43,000 ohm·10⁶
- **Horizontal Flame Test (UL62)**: Complies
- **Vertical Flame Test (UL62)**: Complies

**Other Properties of Tefzel™ ETFE 750**

- **Flexural Modulus (ASTM D790)**: 641.1 MPa (93,000 psi)
- **Specific Gravity (ASTM D792)**: 1.75–1.79
- **MIT Flex Life**: 120,000

*Tefzel™ ETFE 750 meets the requirements of ASTM D3159, Type II, Grade 1.

**Wire Harness Manufacturing Tips**

- **Stripping**: Use automated or manual machines with stripping die blades or with radial V-blades.
- **Termination**: AMP Inc. has designed Faston™ terminals sized especially for Tefzel™ ETFE 750. Part numbers: 61375-1 tin-plated brass (cold side) 63688-1 nickel-plated steel (hot side)
- **Hot Stamp Printing**: Use printing foils designed for Tefzel™ resin, such as Kingsley Machine Inc. K-520 foil. Use temperatures between 163 °C (325 °F) and 204 °C (400 °F) with moderate dwell and pressure.
- **Inks**: Use inks recommended specifically for Tefzel™ resin. These are obtainable from many sources, including:
  - Gem Gravure
  - Formulabs
  - Colorant AB
  - Standard T Chemical
  - American Can Co.
- **Packaging**: To prevent wire-curl and its associated handling problems, request put-ups in drums or spools with large diameter barrels (cores).
Tefzel™ ETFE 750—UL Thermal Studies, Style 10086—Exposure Temperature 232 °C (450 °F), 7 Days

**Tensile Strength, \( T_B \)**

- Original Tefzel™ ETFE 750: 7,000 psi
- After Exposure: 1,250 psi

**Elongation, \( E_B \)**

- Original Tefzel™ ETFE 750: 400%
- After Exposure: 100%

**% Retention**

- Original Tefzel™ ETFE 750: 90%
- After Exposure: 80%

### HOW TO USE THE TEFZEL® BRAND NAME WITH YOUR PRODUCT

Tefzel® is a registered trademark of Chemours for its brand of ETFE fluoroplastic resins. The Tefzel® brand name is licensed by Chemours in association with approved applications. Without a trademark license, customers may not identify their product with the Tefzel® brand name as Chemours does not sell such offerings with the Tefzel® trademark. Unlicensed customers may refer to the Chemours product offering with only the Chemours name and product code number descriptor as Chemours sells its product offerings. There are no fair use rights or exhaustion of rights to use the Tefzel® trademark from buying from Chemours, a Chemours customer or a distributor without a trademark license from Chemours.

If you are interested in applying for a trademark licensing agreement for the Tefzel® brand, please visit teflon.com/license
