Ti-Pure™ titanium dioxide pigments do not include any lead, mercury, hexavalent chromium, polybrominated biphenyls (PBBs) or polybrominated diphenyl ethers (PBDEs) which exceed the level of 1000 parts per million by weight (0.1%), and cadmium which exceeds the level of 100 parts per million by weight (0.01%). Test results were non-detect. As such, Ti-Pure™ titanium dioxide pigments are consistent with requirements called for in 2011/65/EU, as amended (RoHS 2.0), and comparable regulations.

Additionally, Ti-Pure™ titanium dioxide pigments do not include any phthalates Bis(2-ethylhexan-1-yl) phthalate (DEHP), Benzyl butan-1-yl phthalate (BBP), Dibutan-1-yl phthalate (DBP), Diisobutyl phthalate (DIBP), which exceed the level of 1000 parts per million by weight (0.1%). Test results were non-detect. As such, Ti-Pure™ titanium dioxide pigments are consistent with draft amendments to 2011/65/EU proposed in December 2014, proposed entry into force July 2019.

Finally, per proactive testing, results for hexabromocyclododecane (HBCDD) in Ti-Pure™ titanium dioxide pigments were below detection limit. HBCDD was originally proposed for amendment to 2011/65/EU but dropped due to its inclusion in the Stockholm Convention on Persistent Organic Pollutants (POPs) Annex A for elimination.
