Welcome to Chemours.
The catalyst for Higher Value Chemistry.
A wholehearted commitment to customers and chemistry.

Welcome to Chemours, a company that’s something of a paradox. While built upon a 200-year-old legacy and a solid foundation of world-class chemistry and market-shaping brands, Chemours has entered the market with the passion and entrepreneurial energy of a scrappy startup.

As you learn more about who we are and what we stand for, let me assure you that Chemours isn’t a different name for an old way of doing business. At The Chemours Company, you’ll see and experience a customer-centered culture. I can’t promise that we’ll get it right every time, but that will be our goal. You have my word on it. As Chemours, we’re striving to show you every day that one way we define our success is your success. It’s that simple.

If you are a longtime customer (there’s that paradox again!), thank you for sticking with us on this journey. If you have never done business with us before, I invite you to give us a try. I think we’ll live up to your expectations.

Together, let’s create solutions that are better, more reliable, safer, and more sustainable . . . through the power of chemistry.

Kindest regards,

Mark P. Vergnano
President and Chief Executive Officer
Customer-centered chemistry from day one.

We are Living Chemistry.

Our purpose. Our values.

A 200-year-old startup.

The power of thousands of individual catalysts reacting together.

A legacy of iconic brands and industry firsts.

We’re changing the formula.
Using the power of chemistry to shape markets, define industries, and change lives.

That’s Living Chemistry.
Living Chemistry makes everyday life better for all of us. It makes our cars cooler, homes warmer, food fresher, colors bolder, and air cleaner.

Living Chemistry is evolving and ever changing. Constantly transforming. And when we’re able to guide and shape that change, we can turn the ordinary into the extraordinary.
Living Chemistry is what propels us to make customers happier with world-class products, tailor-made solutions, and end-to-end support.

Living Chemistry inspires us to create a legacy of industry firsts.

At Chemours, chemistry is our passion. That passion empowers us to become catalysts for change. The kind of catalysts who help our customers do better, be better, and build better.

Living Chemistry will power the next evolution. And it’s already happening — every day.
Our purpose.
We help create a **colorful**, **capable**, and **cleaner** world through the power of chemistry.

**Colorful**
Making the everyday world brighter and more vibrant with our Titanium Technologies advances.

**Capable**
Making processes more efficient and productive through our Fluoroproducts and Chemical Solutions innovations.

**Cleaner**
Providing solutions that have a positive impact on people’s lives and as little impact as possible on our planet.
Our values.

Pointing the way toward success.
To accomplish our purpose, we are driven by a set of unique values. They guide us in all we do and in how we operate.
There are 200 years of experience behind us. Over the decades, we’ve been the inventors of some of the most influential, market-first products in history. That experience will serve as the foundation for our work moving forward.

Combined with our belief in the power of chemistry, we’ll use our experience to work hand in hand with customers to create new applications and industry-defining solutions that have a greater market impact.
The power of thousands of individual catalysts reacting together.

Every day, thousands of Chemours employees work together to harness the power of chemistry and help customers succeed: chemical engineers, lab technicians, plant operators, service representatives, business analysts, and marketing and sales professionals. It’s a tremendously diverse group—where employees with decades of experience work side by side with the next generation of engineering and technology talent.

In partnership with you, they are the catalysts making change happen at Chemours. We invite you to get to know them.
Chemours is excited to offer a portfolio of well-known brands and a strong history of industry firsts. Names like Teflon™, Ti-Pure™, and Opteon™ not only shaped markets — they invented them.

Chemours is also proud to be a company of firsts, including the first family of more sustainable, next-generation refrigerants and the first pigments for paints that provide one-coat coverage. We’re also the number-one producer of sodium cyanide in the Americas.

As we move forward, we are dedicated to continuing our legacy of partnering with customers to develop new applications and possibilities. Together, we will all be catalysts for better.
Our offerings.

Titanium Technologies
Ti-Pure™

Chemical Solutions
We’re changing the formula.

We are Chemours.
A company committed to being catalysts for change to help create a colorful, capable, and cleaner world through the power of chemistry. We believe chemistry changes lives, shapes markets, and redefines industries. We vow to work hard to accomplish all that and be your partner for success. That’s how we’re bringing Living Chemistry to the world.

We’d love to show it to you in action.
