

FACT SHEET

Chemours is a different kind of chemistry company. One committed to creating a better world through the power of our chemistry.

Built upon a world-class product portfolio, our chemistry powers products that we use every single day to live better—from paints and plastics to refrigeration, air conditioning, transportation, semiconductors, advanced electronics, and more. We are committed to responsible manufacturing to deliver chemistry that is as responsible as it is essential.

Chemours™

Purpose-Driven Performance

In 2021, Chemours delivered strong financial and operational results while keeping our people safe and embracing our core values. We worked relentlessly with suppliers and customers to successfully overcome the obstacles created by COVID including unprecedented supply chain issues. Our team proved that with thoughtful leadership, strong values, a clear purpose, courage and sheer determination, we could build an even stronger foundation for the future.

KEY 2021 MILESTONES

Titanium Technologies

We demonstrated the value of our Ti-Pure™ Value Stabilization (TVS) strategy under one of the most challenging sets of conditions in our history. Through it all, we delivered on our commitments to customers and closed the year with the strongest contractual book of business in our history.

Thermal & Specialized Solutions

We continued to drive increased adoption of Opteon™ low GWP refrigerants and achieved record production levels at the Corpus Christi, Texas facility. The passage of the U.S. AIM Act heralds the beginning of the next wave of transition to low global warming potential solutions in stationary refrigeration.

Advanced Performance Materials

We achieved record sales and earnings by continuing to be a leader in innovation for clean energy and advanced electronics. We have an exciting future ahead, and an established platform to deliver new products that serve market needs across semiconductor manufacturing, 5G, healthcare, electric vehicles, green hydrogen, and more.

Chemical Solutions

We focused the portfolio with the divestiture of the Mining Solutions business in December 2021. The segment is now led by a world-class glycolic acid franchise that continues expansion into new markets, including clean & disinfect and electronics.

OUR STRATEGIC PILLARS

Innovation and Sustainable Solutions

Using deep knowledge and technical capabilities, we develop solutions to customers' toughest problems and enable the creation of products that meet market demand for more sustainable solutions.

Environmental Leadership

We are guided by a commitment to do what's good for people and planet. Through responsible manufacturing we strive to operate in a manner that keeps the local community beautiful, healthy, and safe for everyone.

Community Impact

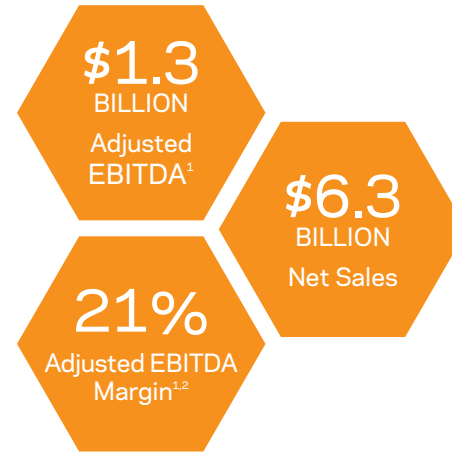

We are committed to making a meaningful difference as an active and invested member of the communities where we live, work, play, and call home.

Greatest Place to Work

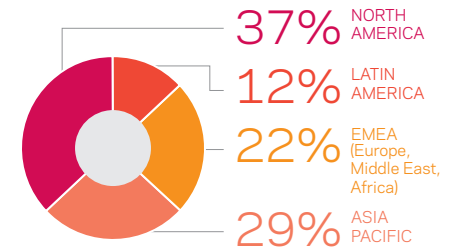

From the frontline to the back office, we strive to make Chemours a company where all employees can reach their full potential and understand that their work makes a meaningful difference.

Chemours: An Overview

Our Corporate Responsibility Commitment

In 2021, we continued to fulfill our Corporate Responsibility Commitments (CRC), making meaningful progress across our 10 bold goals to achieve by 2030. We announced a more ambitious goal to reduce Scope 1 and 2 greenhouse gas emissions by an absolute 60% by 2030, on a path to net zero by 2050. In addition, we launched our Chemours Future of Engineering, Science, Trades, and Technology School Partnership Program (ChemFEST) with middle schools in our footprint communities.

OUR 2030 GOALS:

- Reduce absolute greenhouse gas (GHG) emissions from operations by 60%.
- Achieve net-zero GHG emissions by 2050.
- Reduce air and water process emissions of fluorinated organic chemicals by 99% or more.
- Reduce landfill volume intensity by 70%.
- Improve employee, contractor, process, and distribution safety performance by at least 75%.
- Invest \$50 million in our communities to improve lives by increasing access to STEM skills, safety initiatives, and sustainable environment programs.
- Globally, fill 50% of company positions with women.
- Within the U.S., achieve 20% ethnic diversity in our workforce.
- Generate 50% or more of our revenue from solutions that contribute to the UN SDGs.
- Show a 15% improvement in the sustainability performance of 80% of suppliers by spend.

The Five Values We Live By

We believe that together we can create a better world through the power of our chemistry. We live that commitment through the principles that drive us:

Customer Centered

Refreshing Simplicity

Collective Entrepreneurship

Safety Obsession

Unshakable Integrity

WHAT WE DO

Catalysts for Change

Titanium Technologies

We're a market leader in titanium dioxide (TiO₂) production, a premium white pigment used to deliver whiteness, brightness, opacity, and protection in a variety of applications. Our Ti-Pure™ TiO₂ enhances architectural and industrial coatings, plastics, laminates, coated paper, and coated paperboard used for packaging.

Advanced Performance Materials

We're a market leader in the manufacturing of advanced materials. Our Teflon™ fluoropolymers, Krytox™ performance lubricants, Nafion™ membranes and dispersions, and Viton™ fluoroelastomers can be applied across a wide variety of applications supporting innovation in clean energy, advanced electronics, and beyond.

Thermal & Specialized Solutions

We're a market leader in producing refrigerants, propellants, blowing agents, and specialty solvents. Building on deep knowledge of refrigerants dating back to the commercial introduction of Freon™ in 1930, we are leading the way in the development of sustainable technologies like Opteon™, one of the world's lowest global warming potential (GWP) refrigerant brands.

Chemical Solutions

We're a market leader in the Americas, and manufacture a wide variety of chemicals, including Glypure™ and Vazo™ product lines.
