Policy on Supplier’s Use of Chemours Name

The Chemours Name is an invaluable asset. The Name creates an indelible perception and conclusion about the Company with the consumers of our goods and services and contributes enormously to the company’s success in attaining our goal of sustainable growth.

Chemours does not permit third parties, including suppliers, to use the Chemours Name without permission from Chemours. Permission is given only when Chemours has received clear business value from the Supplier for use of the Chemours Name. As such, suppliers must seek approval from the appropriate Chemours buyer prior to the use of the Chemours Name. The buyer must obtain the approval of the Chemours Chief Procurement Officer to permit a supplier to use the Chemours Name.

Use of the Chemours Brand (e.g. Chemours Logo, Chemours Trademarks, etc.) can only be used with approval by the Chemours Global Brand Manager after S&L has obtained the appropriate approvals.

This policy applies to any use of the Chemours Name, whether in public print or electronic statements including news releases, Internet or Extranet Web sites, annual reports, product packaging, signage, stationery, print literature, and advertising.
