Re: Work Plan for Toxicity Studies Pursuant to Consent Order Paragraph 14

Dear Ms. Holman,

Paragraph 14 of the Consent Order states: “Within thirty (30) days of entry of this Consent Order, Chemours shall submit a plan and proposed schedule for review and approval by DEQ for funding and facilitating the conducting of an initial set of toxicity studies by a qualified third party approved by DEQ relating to both toxicity assays informative to human health and aquatic life sufficient to aid in development of surface water and groundwater regulatory standards for up to five PFAS as determined by DEQ. The plan shall provide for the studies and parameters identified in Attachment B as well as technologically feasible dosing parameters to be agreed upon by Chemours and DEQ.”

Chemours previously submitted a request for approval of the proposed third parties to conduct the toxicity tests and hereby submits its proposed work plan for the toxicity assays for the chemical substances identified in Attachment B. This work plan includes the test guidelines and protocols for each toxicity study, as well as the proposed dosing parameters and schedule of work.

Chemours looks forward to continuing to discuss the implementation of these toxicity studies under Paragraph 14 of the Consent Order so that the necessary work can proceed in a timely manner. If you have any questions or need further information, please let me know.

Sincerely,

A handwritten signature in black ink that reads 'Brian D. Long'. The signature is written in a cursive, flowing style.

Brian D. Long
