Re: Monthly Emissions Report Pursuant to Consent Order Paragraph 8

Dear Mr. Abraczinskas,

Pursuant to Paragraph 8.d of the Consent Order, please find enclosed the December monthly emissions report for GenX Compounds from Fayetteville Works, prepared with support from our consultant, ERM NC, Inc. ("ERM"). The report shows the estimated GenX Compounds emissions through November, the projected emissions for the rest of the year, and the assumptions that underlie the estimates. Based on the identified assumptions, ERM's calculations show that the facility will meet the Consent Order's 92% reduction requirement for plant-wide interim reductions of emissions of GenX Compounds for Calendar Year 2019.

The enclosed monthly emissions report incorporates the results from emissions testing at Vinyl Ethers South (VES) on November 20 and 21. The VES emissions test report, prepared by Weston Solutions, Inc., is also enclosed.

As with the prior monthly emissions reports, the spreadsheet file with the calculations underlying the enclosed monthly emissions report contains confidential business information of Chemours, so we will send that spreadsheet file under separate cover directly to you, and the spreadsheet file will not be further distributed or posted on Chemours' website.

If you have any questions, please contact me at Brian.D.Long@chemours.com.

Sincerely,

A handwritten signature in black ink that reads 'Brian D. Long'.

Brian D. Long
