

Chemours Opens New Teflon™ Finishes Plant in China

State-of-the-art facility will serve Asia-Pacific region with high-quality Teflon™ coatings

SHANGHAI, China, July 25, 2016 – The Chemours Company (Chemours) (NYSE: CC), a global chemistry company with leading market positions in titanium technologies, fluoroproducts and chemical solutions, announced today the opening of its new Teflon™ finishes plant at Chemours' Changshu Works site in Changshu (Jiangsu), China.

Chemours invested \$15 million in this state-of-the-art finishes plant, which will enhance and expand Chemours' production. It will provide China and the Asia-Pacific region with a reliable supply of high quality Teflon™ coatings for both consumer and industrial applications.

The Changshu Works site will be our manufacturing base in China and a world-class center for manufacturing Teflon™ coatings, enabling Chemours to increase its product-development efforts in the fast-growing China market and in other parts of Asia.

"The Teflon™ brand is trusted worldwide and our new finishes plant will have the technological capabilities to maintain the superior product standards expected from the brand," said Jeff Jirak, global business director Chemours Fluoropolymers. "At Changshu, we will be able to leverage existing infrastructure to provide greater flexibility in developing PTFE dispersion coating formulations that are customized for our customers' needs."

This new plant will augment Chemours' already considerable presence in China, which includes a new coatings research and development center and technical service lab in Shanghai. That facility opened earlier in 2016, not only as the center of development for new coatings, but also to support customer needs in China and across Asia.

"We are serving the Asia-Pacific marketplace with manufacturing and formulation improvements that help our customers achieve better performance and higher overall value-in-use when compared to our competitors," said Alec Yan, regional business manager Chemours Fluoropolymers. "Chemours products are critically important in manufacturing and enabling products and services that enhance quality of life, and we believe the Asia-Pacific region represents significant growth and demand for them."

About The Chemours Company

The Chemours Company (NYSE: CC) helps create a colorful, capable and cleaner world through the power of chemistry. Chemours is a global leader in titanium technologies, fluoroproducts and chemical solutions, providing its customers with solutions in a wide range of industries with market-defining products, application expertise and chemistry-based innovations. Chemours ingredients are found in plastics and coatings, refrigeration and air conditioning, mining and oil refining operations and general industrial manufacturing. Our flagship products include prominent brands such as Teflon™, Ti-Pure™, Krytox™, Viton™, Opteon™ and Nafion™. Chemours has approximately 8,000 employees across 35 manufacturing sites serving more than 5,000 customers in North America, Latin America, Asia-Pacific and Europe. Chemours is headquartered in Wilmington, Delaware and is listed on the NYSE under the symbol CC. For more information please visit chemours.com or follow Chemours on Twitter at @chemours.

Forward-Looking Statements

This press release contains forward-looking statements, which often may be identified by their use of words like "plans," "expects," "will," "believes," "intends," "estimates," "anticipates" or other words of similar meaning. These forward-looking statements address, among other things, our anticipated future operating and financial performance, business plans and prospects, transformation plans, resolution of

environmental liabilities, litigation and other contingencies, plans to increase profitability, our ability to pay or the amount of any dividend, and target leverage that are subject to substantial risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. Forward-looking statements are not guarantees of future performance and are based on certain assumptions and expectations of future events which may not be realized. The matters discussed in these forward-looking statements also are subject to risks, uncertainties and other factors that could cause actual results to differ materially from those projected, anticipated or implied in the forward-looking statements, as further described in our filings with the Securities and Exchange Commission, including our annual report on Form 10-K for the fiscal year ended December 31, 2015. Chemours undertakes no duty to update any forward-looking statements.
