

Celebrating National Chemistry Week

Chemours highlights the periodic table as the cornerstone of product innovation and learning

WILMINGTON, Del., October 17, 2016 – The Chemours Company (Chemours) (NYSE: CC), a global chemistry company with leading market positions in titanium technologies, fluoroproducts and chemical solutions, today released a playful series of short videos—*The Periodic Table: Something to Sing About*—to celebrate our favorite science during National Chemistry Week.

“At Chemours, we are proud to be a chemistry company and delighted to express that pride during National Chemistry Week with these short, stop-animation videos that I think will be fun viewing for kids and adults alike,” Mark Vergnano, president and CEO of Chemours. “We might even intrigue some young minds enough to add to the ranks of future chemists.”

The periodic table arranges chemical elements by their atomic number and chemical property; chemists use the table to help make sense of the world around us. It is in many ways a guiding reference for all scientific breakthroughs. Chemours is featuring this iconic symbol of chemistry in these videos to showcase its commitment to chemistry-based innovation. See the periodic table like never before in these short, shareable videos here: chemours.com/national-chemistry-week.

About The Chemours Company

The Chemours Company (NYSE: CC) helps create a colorful, capable and cleaner world through the power of chemistry. Chemours is a global leader in titanium technologies, fluoroproducts and chemical solutions, providing its customers with solutions in a wide range of industries with market-defining products, application expertise and chemistry-based innovations. Chemours ingredients are found in plastics and coatings, refrigeration and air conditioning, mining and oil refining operations and general industrial manufacturing. Our flagship products include prominent brands such as Teflon™, Ti-Pure™, Krytox™, Viton™, Opteon™ and Nafion™. Chemours has approximately 8,000 employees across 35 manufacturing sites serving more than 5,000 customers in North America, Latin America, Asia-Pacific and Europe. Chemours is headquartered in Wilmington, Delaware and is listed on the NYSE under the symbol CC. For more information please visit chemours.com.
